Asian weeks

Wakame

Wakame is a marine brown algae species from the Laminariales order. In Japan and Korea, it is highly valued as a food. Wakame salad made from cooked, finely chopped wakame with a little sesame oil, chili and sesame seeds is also known as chuka wakame

Wasabi

Wasabi, also known as Japanese horseradish or water horseradish, is a plant species from the cruciferous family and is used as a hot spice in Japanese cuisine. As a wild plant, the species is native to swampy areas at the edge of watercourses in Japan. Real wasabi is available as a fresh tuber, which is grated directly at the table on a grater, as a frozen, grated paste or as a freeze-dried powder, which must be mixed with water.

Sriracha sauce, Sriracha mayoo

Sriracha sauce is a hot chili sauce named after the coastal town of Si Racha in Thailand. It is made from chili peppers, vinegar, garlic, sugar and table salt. A conventional Sriracha sauce has a heat level of 2,500-5,000 Scoville. (Spiciness level for determining the pungency of the fruits of the bell pepper plant). Sriracha Mayoo is a vegan "mayonnaise" with Sriracha.
